

# ZPHISHER

29<sup>th</sup> Sep 2022

## OVERVIEW

**Zphisher** is a powerful open-source tool Phishing Tool. Zphisher is easier than Social Engineering Toolkit. It contains some templates generated by a tool called Zphisher and offers phishing templates webpages for 18 popular sites **such as Facebook, Instagram, Google, Snapchat, GitHub, Yahoo, Proton mail, Spotify, Netflix, LinkedIn, WordPress, Origin, Steam, Microsoft, etc.** It also provides an option to use a custom template if someone wants. This tool makes it easy to perform a phishing attack. Using this tool you can perform phishing in (a wide area network). This tool can be used to get credentials such as **IDs, and passwords.**
